EDUCATION

Stevens Institute of Technology
Bachelor of Science, Computer Science

August 2019 – May 2023
GPA: 3.83/4.00

SKILLS

Languages: Java, C++, Python, C, JavaScript, TypeScript, HTML, CSS, Bash, Terraform, SQL, GraphQL
Frameworks and Libraries: Spring Boot, React, Next.js, Redux, Vue, Nuxt.js, Express.js, Node.js, Storybook
Databases, Cloud, and Tools: Docker, Splunk, MongoDB, PostgreSQL, Git, AWS (EC2, Lambda), Grafana
Testing: Jest, Cypress, Cucumber, JUnit, React Testing Library

EXPERIENCE

JPMorgan Chase & Co.
Software Engineer

August 2023 – Present
Jersey City, NJ

- Implemented reusable React components for a new internal developer portal used to manage APIs across the firm, enhancing developer experience and accelerating adoption across multiple lines of business
- Contributed new features to automate the API subscription process for internal and external developers within Chase, transforming a previously months-long manual process to an automated process completed in minutes
- Engineered a solution in Spring Boot to migrate 1000+ API documentation files from a legacy system to a new API management platform, ensuring data consistency across both systems and eliminating manual migration effort for API owners
- Increased code coverage from 0% to 85% for an internal application used to track the migration of 1500+ Chase internal APIs across data centers, improving code reliability and enabling its first production release
- Refactored the new internal developer portal to integrate with a policy-based IAM system, replacing role-based authentication to tighten application security and enable fine-grained user access controls

JPMorgan Chase & Co.
Software Engineer Intern

June 2022 – December 2022
Jersey City, NJ

- Led the integration of a new incident analysis feature using React and Redux, improving root cause tracing for 100+ Asset & Wealth Management applications and reducing downtime through faster incident resolution
- Deployed AWS Lambda functions with Terraform to clean inactive cloud resources, contributing to an initiative that saved \$40,000 per month in cloud costs

Colgate-Palmolive

January 2022 – May 2022
Remote

Application & Software Development Intern

- Developed and optimized responsive UI components for Colgate-Palmolive's Direct-to-Consumer websites using Vue, Nuxt.js, and Tailwind CSS, improving page performance and customer engagement
- Built and maintained unit and end-to-end test suites with Jest and Cypress, sustaining 90%+ code coverage and ensuring high reliability across releases
- Identified and resolved bugs in Shopify templates, creating a smoother shopping experience and increased customer retention

PROJECTS & VOLUNTEERING

Stevens Castle Point Anime Convention Club
Lead Webmaster (Volunteer)

August 2019 – August 2023
Hoboken, NJ

- Aided in the development of Castle Point Anime Convention's website using Hugo and deployed with AWS Amplify
- Created a webpage used to advertise and support 50+ local artists and businesses affected by COVID-19
- Led website maintenance responsibilities with a team of 10+ student developers using Agile principles

Shima

HackNJIT 2022 First Place Winner

November 2022

- Built a cross platform mobile app which provides a trail for lost hikers to retrace their steps using Google Maps API and Flutter

Quick on the Trigger Trivia Bot

March 2021 – May 2021

- Developed an interactive Discord trivia chat bot for an online Convention using Node.js and MongoDB
- Deployed an AWS EC2 instance to host the bot and released on a chat server consisting of 1000+ members
