EDUCATION

Stevens Institute of Technology
Bachelor of Science, Computer Science

August 2019 – May 2023
GPA: 3.83/4.00

SKILLS

Languages: Java, C++, Python, C, JavaScript, TypeScript, HTML, CSS, Bash, Terraform, SQL

Frameworks and Libraries: Springboot, React, Next.js, Redux, Vue, Nuxt.js, Express.js, Node.js, Storybook

Databases, Tools, and Services: Docker, Kubernetes, Splunk, MongoDB, Git, AWS (Cloud Practitioner Certified), Grafana

Testing: Jest, Cypress, Cucumber, JUnit, React Testing Library

EXPERIENCE

JPMorgan Chase & Co.
Software Engineer I

August 2023 – Present
Jersey City, NJ

- Spearheaded development of JUnit tests for an application which tracks the migration of 1500+ APIs across data centers, increasing coverage from 0% to 85%
- Implemented new features in a Command Line Interface (CLI) application used monthly by 1300+ internal users to manage APIs across API Gateways using Go
- Developed features for a self-service API subscription tool which contributed to overhauling previous manual developer workflows using Java and Springboot

JPMorgan Chase & Co.
Software Engineer Intern

June 2022 – December 2022
Jersey City, NJ

- Led the integration of a new incident analysis tool which improved tracing the cause of downtime for 100+ Asset Wealth Management applications using React and Redux
- Deployed AWS Lambda functions with Terraform to clean cloud resources which contributed to \$40,000 of monthly savings
- Increased and maintained a code coverage average of 90% for Python and Jest unit tests

Stevens Institute of Technology
Course Assistant

May 2021 – December 2022
Hoboken, NJ

- Guided students across two semesters of Systems Programming which covered Bash scripting and C programming
- Mentored students in full-stack web development topics using Node.js, Express.js, and MongoDB

Colgate-Palmolive

January 2022 – May 2022
Remote

Application & Software Development Intern

- Developed responsive user interface components for Direct-To-Consumer websites using Vue, Nuxt.js and Tailwind CSS
- Utilized Jest and Cypress to create unit tests for Vue components and thorough end-to-end tests.
- Collaborated with engineers through scrum stand-ups, code reviews, and pair programming to ship production ready code

PROJECTS & VOLUNTEERING

Stevens Castle Point Anime Convention Club
Lead Webmaster (Volunteer)

August 2019 – August 2023
Hoboken, NJ

- Aided in the development of Castle Point Anime Convention's website using Hugo and deployed with AWS Amplify
- Created a webpage used to advertise and support 50+ local artists and businesses affected by COVID-19
- Led website maintenance responsibilities with a team of 10+ student developers using Agile principles

Shima

HackNJIT 2022 First Place Winner

August 2019 – August 2023

- Built an app with Flutter which provides a trail for lost hikers to retrace their steps using Google Maps API

Quick on the Trigger Trivia Bot

March 2021 – May 2021

- Developed an interactive Discord trivia chat bot for an online Convention using Node.js and MongoDB
- Deployed an AWS EC2 instance to host the bot and released on a chat server consisting of 1000+ members
