EXPERIENCE

JPMorgan Chase & Co.

Software Engineer II

February 2026 – Present

Jersey City, NJ

- Designed and led development of a real-time notification microservice using Spring Boot and DynamoDB, cutting developer portal alert latency from hours to seconds for 500+ internal users
- Automated integration tests in the Jenkins CI/CD pipeline for a Spring Boot microservice, eliminating manual evidence uploads and recovering 100+ developer-hours annually across weekly production releases
- Overhauled the weekly release changelog process by introducing a Node.js-based CLI tool to automatically compile a list of changes, saving release coordinators 20+ hours every month

JPMorgan Chase & Co.

Software Engineer I

August 2023 – February 2026

Jersey City, NJ

- Built a reusable React component library for an enterprise developer portal serving 100+ internal teams, enabling self-service API Gateway access and accelerating developer onboarding
- Contributed new features to automate the API subscription process for internal and external developers within Chase, transforming a previously months-long manual process to an automated process completed in minutes
- Engineered a Spring Boot microservice to automate the migration of 1000+ API documentation files from a legacy platform to a new API management system, preserving data integrity and eliminating manual migration work for API owners
- Increased code coverage from 0% to 85% for an internal application used to track the migration of 1500+ Chase internal APIs across data centers, directly unblocking its first production deployment
- Refactored the developer portal to integrate with a policy-based IAM system, replacing role-based authentication to tighten application security and enable fine-grained user access controls

JPMorgan Chase & Co.

Software Engineer Intern

June 2022 – December 2022

Jersey City, NJ

- Led the integration of a new incident analysis feature using React and Redux, accelerating root cause identification across 100+ Asset & Wealth Management applications and reducing mean time to resolution
- Deployed AWS Lambda functions with Terraform to clean inactive cloud resources, contributing to an initiative that saved \$40,000 per month in cloud costs

Colgate-Palmolive

Application & Software Development Intern

January 2022 – May 2022

Remote

- Developed and optimized responsive UI components for Colgate-Palmolive's Direct-to-Consumer websites using Vue, Nuxt.js, and Tailwind CSS, improving page performance and customer engagement
- Built and maintained unit and end-to-end test suites with Jest and Cypress, sustaining 90%+ code coverage and ensuring high reliability across releases
- Identified and resolved bugs in Shopify templates, creating a smoother shopping experience and increased customer retention

SKILLS

Languages: TypeScript, JavaScript, Java, Python, HTML, CSS, Bash, Terraform, SQL, GraphQL

Frameworks and Libraries: React, Next.js, Spring Boot, Redux, Vue, Nuxt.js, Express.js, Node.js, Storybook

Databases: DynamoDB, MongoDB, PostgreSQL

Cloud and Tools: Docker, Kubernetes, Splunk, Git, AWS (EC2, EKS, Lambda), Grafana, Jenkins, Linux, GitHub Copilot

Testing: Jest, Cypress, Cucumber, JUnit, React Testing Library

Methodologies: Agile, CI/CD, REST APIs, Microservices, DevOps

EDUCATION

Stevens Institute of Technology

Bachelor of Science, Computer Science

August 2019 – May 2023

GPA: 3.83/4.00
